MANAGEMENT DISCUSSION AND ANALYSIS

INDUSTRY STRUCTURE AND DEVELOPMENT

Alufluoride Ltd (AL) is the only Company in Andhra Pradesh producing high purity Aluminium Fluoride (AlF₃) with technology developed by Aluisse, Switzerland. This technology facilitates conversion of Fluorine effluents from Phosphatic Fertilizer Complex into Hydrofluosilicic Acid and then to Aluminium Fluoride. The project ensures pollution abatement, import substitution, conservation of natural resources like Fluorspar & Sulphur, cost effective product, conversion of waste into wealth and earning valuable foreign exchange to the Nation. AlF₃ is used as flux in reducing the melting point of Alumina during the electrolytic process of producing Aluminium. Many Aluminium Smelters in India and abroad are using the Company's product with repeat orders for increased quantities due to its quality and service.

FUTURE OUTLOOK, OPPORTUNITIES, THREATS, RISKS & CONCERNS

Alufluoride Ltd (AL) set up the project in 1995 to produce AlF₃ and related products, based on an agreement between AL and Coromandel International Ltd, Visakhapatnam (CIL). As per the agreement, CIL is to supply 4,000 TPA of Hydrofluosilicic Acid (Acid) exclusively to AL. However, since inception CIL was unable to supply the contracted quantity and the supplies from them were deteriorating year after year. Consequently, AL's financial results were adversely affected.

It is reported that, all the Aluminium smelters in India and abroad are increasing their Aluminium production capacities and also new Aluminium smelters are coming up with high capacities, resulting in an increased demand for AlF₃.

The only risk & concern for the Company is availability of Acid. When the acid is procured from other sources, the landed cost increases significantly due to transport cost. As the Company is now Debt-free, with efficient working capital management, improved AlF₃ sales realization, etc., your Directors are hopeful of improved financial results.

The Company is getting offers from Acid producers that they would like to supply the Acid on a

long-term basis. The Company is pursuing these various sources for assured supplies from them on a long-term basis. If these efforts are successful, the Company can post good financial results.
